natureSecret

The **natureSecret** colours represented here are approximations only.
See the colour swatch on each pail for exact colour.

The natureSecret Process:

When previously purchased paint arrives at Calibre Environmental, it needs to pass an intense quality inspection protocol prior to being re-blended into one of the 14 colours. After a final mix and filtering to industry standards, quality **natureSecret** paint is packaged for resale. While processing **natureSecret**, most of the old metal and plastic containers are recycled as well.

natureSecret Benefits:

natureSecret usually dries to the touch within one hour and a second coat can be applied after two hours.

When applying **natureSecret** by brush, roller or sprayer, you get minimal splatter and super coverage over old and primed new wood, drywall, stucco, vertical concrete and cinder block, both indoors and out!

Premium Quality natureSecret

natureSecret is tested for performance, proving to be a safe, premium recycled paint. **natureSecret** recycled latex paint meets or beats the standards of more expensive new paint.

Save Money

When used side by side with a more costly virgin latex product, **natureSecret** will perform at least as well on any surface where a virgin, low sheen acrylic latex is typically used.

Tips for using natureSecret

- When painting over new or previously painted darker colours, at least two coats are suggested. If painting over a similar or lighter colour, a single coat of **natureSecret** is sometimes sufficient.
- Due to the nature of premium performance **natureSecret** recycled paint, we cannot guarantee exact colour matches from batch to batch; however we do strive for colour consistency.
- To minimize potential colour issues, be sure to purchase enough paint from the same batch for each project (listed on the label of each pail).
- Touch ups in the middle of a surface are not recommended. We suggest painting from corner to corner to minimize noticeable difference from previously painted walls.

natureSecret

THE ENVIRONMENTAL CHOICE

Every gallon of recycled paint used prevents 115 pounds of carbon from being released into the atmosphere.

THE PERFORMANCE CHOICE

High solid content provides premium quality hide and cover.

THE ECONOMIC CHOICE

natureSecret performs as well as a more expensive virgin product.

Interior / Exterior

We are committed to providing a consistent, premium quality, affordable recycled latex paint! By making the conscious choice to use natureSecret, you are helping the environment without sacrificing price or quality. natureSecret is not necessarily the only paint you need; however, it is an important part of your painting project. There is no paint project that natureSecret can't be a part of.

Interior/exterior natureSecret latex paint has an eggshell finish with the washable qualities of a semi-gloss paint. Use it on walls, ceilings, trim, fences, sheds and any other surface where other quality latex paints would normally be used. We do not recommend using natureSecret on walked on surfaces or high impact surfaces such as doors.

To ensure proper adhesion of natureSecret paint, repair any surface deficiencies, lightly sand the surface and ensure it is clean and clear of dust prior to painting. Prime new wood and hard, unpainted substrates such as metal or vinyl before applying natureSecret. Use the table below to determine the approximate amount of natureSecret you need for your project.

Approximate natureSecret Coverage		Square feet per gallon or pail		
		1 gal can	2.6 gal pail	5 gal pail
Drywall	New (1st Coat)	300	750	1500
	Previously Painted	400	1000	2000
Wood	New (1st Coat)	200	500	1000
	Previously Painted	300	750	1500
Stucco	New (1st Coat)	150	375	750
	Previously Painted	200	500	1000
Vertical Concrete	New (1st Coat)	250	625	1250
	Previously Painted	350	875	1750
Cinder Block	New (1st Coat)	100	250	500
	Previously Painted	200	500	1000
