

LEEDS Potential Points to be earned using

natureSecret

100% Post Consumer - Recycled - Latex Paint
www.RecyclePaint.com

As manufacturers of premium quality, interior/exterior **natureSecret** recycled latex paint, we suggest looking into the following categories to earn points toward LEED certification.

MATERIALS & RESOURCES

- **Construction waste management (Credit 2):** Once your project has been completed, ensure any leftover latex paints are sent, or brought to Calibre Environmental for recycling into **natureSecret** recycled paint to assist you in earning up to **2 points**
- **Recycled content (Credit 4):** Made from nearly 100% of post-consumer recycled latex paints, **natureSecret**, can assist your project in earning up to **2 additional points**
- **Regional materials (Credit 5):** **natureSecret** is produced in both Calgary, Alberta & Surrey, BC; so, if you are within the prescribed distance, you may qualify for up to **2 points**

natureSecret is made primarily from paint collected from municipalities in Western Canada

natureSecret is great for use in parkades

INDOOR ENVIRONMENTAL QUALITY

- **Low-Emitting materials-Paints & Coating (Credit 4):** Calibre is confident that our product is a low VOC product; however, due to the nature of **natureSecret** paint, it is financially prohibitive to test each batch. To help you attain the Paints & Coatings point, we will produce and test a batch of **natureSecret** specifically for your project. Once low VOC content has been confirmed, you will be eligible to reach for the **1 point**.

INNOVATION & DESIGN PROCESS

- **Innovation in design (Credit 1):** As an early adopter using **natureSecret** recycled paint for your LEED project, you may have the ability to reach **up to 4 additional points**.
